PROFILE

A graduate with a master's degree (FM) in Educational Technology, with practical experience in developing digital pedagogical online training courses in the Moodle environment, producing digital learning content, and developing user-oriented online services. My expertise focuses on learning environments, pedagogical design, accessibility, usability and the application of artificial intelligence in teaching. I am seeking specialist roles in the fields of educational technology, digital pedagogy or digital content development.

WORK EXPERIENCE

Freelancer

4/2026 – 8/2026

Hämeen Sähköasennus Oy, Hämeenlinna

- I digitized the forms used by the company: I designed the form structure and fields in Excel, implemented fillable text fields in Bluebeam Revu, and finalized the layout and readability in Adobe Acrobat.
- Revised and updated the company's documents to comply with standards and regulations in the electrical installation sector.

Website renovator

7/2025 – 11/2025

Raken Oy & Hämeen Sähköasennus Oy, Hämeenlinna

- I redesigned the websites for both companies on their respective platforms: for one, I made effective use of the platform's content management tools; for the other, I made direct HTML/CSS edits and improvements to the older code base.
- I improved the usability, accessibility and visual design of the websites with a user-centered approach.

Web content producer

6/2023 – 9/2023

Loistox Oy, Hämeenlinna

- I produced content for the website and online shop to meet business needs.
- I implemented search engine optimization for products and web pages, which increased the number of visitors to the site.
- I ensured accessibility, usability and a clear content structure in all my work.

Delivery truck driver

6/2024 – 9/2024

Kuljetuspalvelut T. Siren Oy, Hämeenlinna

- I handled deliveries between companies on schedule and responsibly.
- I worked smoothly with customers and ensured the reliable delivery of the service.

KOULUTUS

Master of Science in Educational Technology

8/2024 – 7/2026

University of Jyväskylä — graduated

- Specialization: IT expertise in educational technology.
- Master's thesis, The Connection Between Smartphone-Related Psychological Phenomena, Cognitive Functions, and Self-Regulation Among IT Students in Higher Education— examined phenomena related to smartphones (e.g. brain drain, nomophobia, FOMO) in relation to cognitive load and academic self-regulation. Data was collected via a questionnaire and analyzed statistically using Jamovi software.
- My studies focused on learning environments, digital pedagogy, the pedagogical use of technology, programming and development work.

Bachelor of Educational Technology

8/2021 – 11/2024

University of Jyväskylä — graduated

- Major: Information Technology. Minors: Educational Sciences.
- My bachelor's thesis, Utilizing text-generating artificial intelligence for learning, explored the opportunities, risks and ethical considerations associated with the use of language models (e.g. ChatGPT, Claude) in teaching.

PROJECTS

Reforming online education course

student project, group work

- As part of a group project, I was responsible for the IT implementation in the Moodle environment, which had to work with two different versions of Moodle.
- I independently identified the technical limitations and compatibility issues between the versions by studying the documentation and testing both environments, and I documented my findings before content production began.
- I reported my findings to the team in advance, which saved the group time: we knew straight away what could be achieved on each version, and there was no need to amend the content afterwards.
- As part of the team, we produced learning content that was both pedagogically sound and accessible, based on the briefs provided, considering both underage and adult users.

SKILLS

Technical skills

- HTML, CSS, JavaScript, React
- Digitisation of forms: Excel, Bluebeam Revu, Adobe Acrobat
- Search engine optimisation (SEO)
- Microsoft 365: Teams, Word, PowerPoint

Digital Pedagogy and Learning Environments

- Moodle, Google Classroom
- Digital content production and pedagogical design
- Development of learning environments
- Accessibility and usability

Research skills

- Quantitative survey research
- Statistical analysis (Jamovi)

Work skills

- Collaboration and communication skills
- Proactivity and independent problem-solving
- User-centred development
- Structuring and clarifying content

LANGUAGE SKILLS

- Finnish: mother tongue
- English: fluent
- Swedish: satisfactory
